WORK EXPERIENCE / PROJECT

FOOD PICKER WEB APP

Self-initiated project | [Tech Stack: HTML, CSS, JavaScript, React/Next.js, Supabase]

- Built a responsive web app that helps users decide meals using random dish generation.
- Implemented login authentication, dark/light mode toggle, and dynamic recipe views.
- Designed a clean UI with reusable components and mobile-first design.

Key Features & Concepts Implemented:

- Implemented email/password authentication using Supabase.
- Applied global CSS variables for root color theming.
- Prevented hydration mismatch by using proper HTML structure and use client directive.
- Passed props to the Navbar component for handling the logout button.
- Used page.js routing to manage navigation and linking.
- Built responsive layout using CSS Grid: grid-template-columns: repeat(3, 1fr).

React & JS Concepts Practiced:

- Asynchronous code handling with async, await, and fetch.
- State management with useState, and side effects with useEffect.
- Functional components and usage of const and functions in modern JavaScript.

► EDUCATION

- **INDIRA COLLEGE OF COMMERCE & SCIENCE**

2023- 2026

Bachloer in Business Administration
(Computer Application).

‘BBA-CA’

► LANGUAGE

English.

Marathi

Hindi
